

Glasshouse Lettuce

Little Gem | Butterhead | Curly

The last short day season, Growers experienced some of the hardest growing conditions in 25 years. Practically everything was thrown at us from a warm Autumn, harsh frosts and then snow. Our commercial varieties came through with flying colours and looking forwards, we are very pleased to introduce new trial varieties of Gem, Butterhead and Curly for 2010.

Thanks for working with Enza Zaden and we wish you every success for this next season.

Little Gem

Duncan

A consistent gem giving good winter weight and speed. Once halved, it displays a very good dense yellow heart that contrasts strongly against the medium green outer leaves. With good shape, size and offering the latest brexia resistance.

HR: BI:1-27

Orsay

The mid winter specialist offering good shape and fill for this very difficult growing period.

HR: BI:1,4-26 | IR: LMV

Butterhead

Trinette

A lettuce with a good heart and even head weights, with upright outer leaves and the ability to fill in mid winter and one of our strongest lettuces against mildew! Trinette, consistent and reliable for quality and production!

HR: BI:1-27

ENZA ZADEN

Glasshouse Lettuce

Curly

E 19.2610 New!

The reliability of our new curly lettuce looks to help the grower into the future of short day lettuce growing. Offering the latest level of mildew resistance and with an excellent product model with a strong leaf, strong base and strong against tipping. A lettuce that has good speed with the ability to stand.

E 19.2610 for a new confidence in short day curly growing!

HR: Bl:1-27

E 19.9999

For introductory trials.

HR: Bl:1-27

HR: High Resistance | IR: Intermediate Resistance

Fungi: Bl: Bremia lactucae | Nr: Nasonovia ribisnigri | LMV: Lettuce Mosaic Virus

All descriptions and general recommendations are based on general conditions and should be used as a guide only. The user should apply it in accordance with his own knowledge and experience of local conditions. No liability will be accepted by Enza Zaden for the final performance as based on this information. Current information concerning the resistances is available on www.enzazaden.co.uk
